1. Burnable waste

This waste is combustible and is typically categorized as follows:

- Kitchen waste (fruit and vegetable scraps, leftovers, egg shells, seafood shells, aluminum foil, etc.)
- Soiled paper (used tissue paper, disposable diapers, food containers that cannot be rinsed clean, etc.)
- Plastic products (washing basins, rulers, CDs, balloon pens, video tapes, etc.)
- Clothing, blankets, etc.
- Leather and hide goods
- Rubber and vinyl goods
- Wooden items, woodchips and timber
- Charcoal, drying agents, gel ice-packs, disposable pocket warmers
- Religious items (tissues, paper) in religions that use them for offerings
- Prayer books, religious items
- Wooden items, woodchips and timber
- Charcoal, drying agents, gel ice-packs, disposable pocket warmers

2. Non-burnable waste

This waste cannot be burned and is typically categorized as follows:

- Glass, china, fluorescent lamps
- Blocks, bricks
- Metal products (pans, kettles, metallic toys, staples, etc.)
- Small household electrical appliances (electric kettles, hairdryers, video cameras, clocks, calculators, bathroom scales, etc.)
- Containers that cannot be collected as "plastic containers and packaging" or "bottles, cans and PET bottles" (e.g., containers, paint and chemical cans, lighters, etc.)

3. Pressurized spray cans, gas cartridges

These are freon-free and must be handled carefully to avoid leakage.

How to put out for collection

- Liquefied petroleum gas
