The design of the types of designated waste bags and how to use them

The designated waste bags can be used for either burnable or non-burnable waste. Waste should be separated into burnable and non-burnable, put in separate bags and placed at the waste collection stations by 8:00 a.m. on the respective collection days (Please do not put out garbage the day before).

Four sizes are available (50, 100, 200, 400) and are shown in the table below.

<table>
<thead>

* Bags are sold in packs of 5 or 10, but please note that refunds cannot be given for unused bags.

Waste not collected by the City

① Prohibited items: Items such as TVs, refrigerators, freezers, washing machines, tumble dryers, air conditioners, PCs, TVs, batteries (other than regular dry batteries), domestic fuel tanks, drum cans, propane gas cylinders, motorcycles, automobiles, containers containing oil or paint, plastics, syrings, ephedrine and other chemicals, fire extinguishers and other asbestos safety cannot be collected by City authorities. Please arrange for them to be dealt with by vendors or specialist contractors. In particular, TVs, refrigerators, freezers, washing machines, tumble dryers and air conditioners should be collected for recycling by shops where they are sold. In these cases, separate collection and recycling fees are required.

② Large amounts of waste (when moving, etc.): If you have to dispose of large amounts of waste, for example when moving to a new house, please make your own arrangements for transportation to a waste disposal site, or have a City of Sapporo-authorised contractor (for details, call the Sapporo Environmental Operations Public Corporation at 315-8263) collect it for you. However, city authorities will collect a large amount of waste if it consists only of bulky refuse and is put out to coincide with a day of collection.

Garbage & Waste Sorting Guide

Waste is separated into nine different categories: burnable waste, non-burnable waste, plastic containers and packaging, bottles, cans and PET bottles, branches, leaves, grass and weed cuttings, miscellaneous paper, pressured spray cans and gas cartridges, dry batteries, and bulky refuse.

A fee is charged for the collection of burnable waste, non-burnable waste and bulky refuse, but all other types of waste are collected free of charge.

Burnable and non-burnable waste should be put in the designated waste bags and the free-of-charge waste should be put in ordinary transparent or transparent bags and placed at waste stations by 8:00 a.m. on the day of collection. (Please do not put out garbage the day before).

Bulky refuse is collected from individual houses upon receipt of payment. Please call the Bulky Refuse Collection Center to arrange collection.

Waste collection days differ depending on the area in which you live. Please confirm the days on the household garbage collection calendar distributed by your local ward office.

Policy: The waste sorting guide is a guide to help households manage their waste in an environmentally friendly manner. By sorting waste correctly, households can help to reduce the amount of waste sent to landfill and increase the amount of waste that can be recycled. This is important in order to reduce the environmental impact of waste disposal and to promote recycling as a sustainable alternative to landfill.
