

CALL FOR SHORT FILMS

from UNESCO CREATIVE CITIES

ABOUT

Green Visions Potsdam is a unique festival combining film, science and a market for sustainable living - each of which spotlights environmental issues surrounding the future of our planet.

The festival informs and entertains with films and in-depth discussions on wide-ranging topics related to our environment, climate change and what we can do about it.

We welcome short film submissions from all cities and creative fields within the international UNESCO Creative Cities Network.

If selected, the films will be invited to take part in a special section of the festival, which will take place in Potsdam from 28th until 31st of May 2026.
